DETAILED ACTION

Remarks

1. This communication is responsive to the decision from the Board of appeals dated September 21st, 2007. Claims 1-34 are allowable.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

The application is allowable for the reasons set forth on page 5 of the decision of the Board of Patent Appeals, which is hereby incorporated by reference. As noted therein, and as argued on page 13 of Appellant's brief, the claimed invention requires exchanging subfiles among said plurality of recipient nodes of said first group such that each recipient node of said first group obtains all of said plurality of subfiles, wherein at least one recipient node of said first group begins communicating a portion of its respective subfile that it is receiving from the first node to at least one other recipient node of said first group before the at least one recipient node fully receives its respective subfile whereas the closest prior art teaches exchanging subfiles/files in an streaming fashion that is in parallel and simultaneously across computers that can be both clients and servers (transmitting and receiving files).

The U.S. Patent Application Publication 2002/0133491 (Sim et al.) reference listed on the PTO-892 form accompanying this action is close to the subject matter of

Art Unit: 2161

the claims but appears to also not teach the specific way to exchange subfiles argued by the Appellant (as mentioned above).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
